PENTOSIN ATF 44

Long-Life Fully Synthetic Automatic Transmission Fluid

DESCRIPTION

Pentosin ATF 44 is mainly designated for use in Aisin AW automatic transmissions being used in a large number of Japanese passenger cars and light duty vehicles. It can also be used in select American and European models. Due to its outstanding properties, Pentosin ATF 44 can be used in many aggregates of Asian origin or where DEXRON III-type fluids are demanded. Pentosin ATF 44 is miscible and compatible with conventional branded gear oils. Mixing with other gear oils should be avoided in order to fully utilize the product's benefits. A complete fluid change is recommended when converting to Pentosin ATF 44.
